

Can I get NBN in an outbuilding or granny flat?

In most cases, outbuildings or granny flats that share the same address as the primary residence on a block of land cannot apply for a new **nbn**TM broadband access network connection – each connection must be linked to a unique address.

To connect outbuildings or granny flats to the **nbn**TM access network, you may need to extend your existing connection from the primary residence – by either extending the signal of your local Wi-Fi network, or by installing an additional service through a registered cabler.

Things to consider:

- If you're in the process of applying for a new address (i.e. sub-dividing one address into two or more lots) and would like to connect it to the **nbn**TM access network, then you should apply as a new development.
- FibreMax may be able to assist you with an additional service. Be sure to discuss your plans with us before commencing any work as additional services may incur extra charges or require specific requirements.
- All customer cabling must be performed by a registered cabler using the **nbn**TM standards and guidelines.
- To make the most of your internet connection, optimise your experience at home.

How to optimise your experience at home

Make the most of your internet connection with these tips for your in-home set-up.

- Your choice of Wi-Fi router/modem
- Objects that interfere with your Wi-Fi signal
- The effect of different Wi-Fi signals
- Thick/complex walls
- Multiple devices connected at the same time
- High Definition TV
- In-home cabling
- Older devices
- Device compatibility
